Sir:

In response to the Office Action dated December 13, 2004, Applicants request
reconsideration for the following reasons:

REMARKS

In the Office Action, the Examiner rejected claims 1-10 based on the patent to Maris
(5,844,684) in view of Maris (6,211,921).

In the previous Office Action (dated July 22, 2004), the Examiner relied on the same two
patents to reject the claims. In their previous response, applicants pointed out that while the
Maris references disclose the general concept of "interpolation," they failed to teach or suggest
*"an interpolation model that defines a substantially continuous function which intersects with
the interpolation points."* This concept is found in applicants' pending independent claims 1
and 5.

In the pending Office Action, the Examiner disagreed with the applicants. In support of
her position, the Examiner referred to a statement in applicants' specification at page 8, line 23
